Fluid Phase Equilibria 137 (1997) 293–294

FLUID PHASE EQUILIBRIA

Contents of Volume 137 (1997)

Vol. 137, No. 1

Equilibrium properties: theoretical, phenomenological or correlational papers

An improved perturbation theory and van der Waals one-fluid theory of binary fluid mixtures. Part 2. Phase equilibria
K. Fotouh and K. Shukla (Prairie View, TX, USA) 1–16

A vapor pressure model for aqueous and non-aqueous solutions of single and mixed electrolyte systems
T.-J. Chou and A. Tanioka (Tokyo, Japan) 17–32

A lattice fluid approach to complex mixtures: natural gas and crude oil
R. Von Bergen, Y. Von Bergen and E. Rogel (Caracas, Venezuela) 33–52

A new enthalpy-of-vaporization equation
H.W. Xiang (Beijing, China) 53–62

Estimations of enthalpies of vaporization of pure compounds at different temperatures by a corresponding-states group-contribution method
P. Li, Y.-H. Liang, P.-S. Ma and C. Zhu (Tianjin, China) 63–74

Calculation of chemical potential for structured molecules using osmotic molecular dynamics simulations
M. Henrichsen and R.L. Rowley (Provo, UT, USA) 75–85

Vapor–liquid equilibria for pure HCFC/HFC substances by Gibbs ensemble simulation of Stockmayer potential molecules
G. Gao, W. Wang and X.C. Zeng (Lincoln, NE, USA, Beijing, China) 87–98

Evaluation of series coefficients for classical equations of state
C.D. Singley, I.P. Burns and M.J. Misovich (Villanova, PA, USA) 99–109

A conjugation-based version of the UNIFAC method
M. Foisy, D. Takamoto and M.L. Mavrovouniotis (Evanston, IL, USA) 111–119

Equilibrium properties: papers with an experimental part

Speed of sound and ideal-gas heat capacity at constant pressure of gaseous trifluoroiodomethane (CF_3I)
Y.Y. Duan, L.Q. Sun, L. Shi, M.S. Zhu and L.Z. Han (Beijing, China) 121–131

Molecular shape effects on limiting activity coefficients: normal, branched and cyclic alkanes in 1-propanol or 2-propanol
P. Vrbka, V. Dohnal, L.M. Trejo and M. Costas (Prague, Czech Republic, México) 133–140

Excess molar volumes of binary mixtures containing vinyl acetate + alkyl acetates at 298.15 K. Anomalous behavior of methyl acetate + vinyl acetate mixtures
C. González, J.M. Resa, J. Lanz and J.A. Mtz. de Ilarduya (Vitoria, Spain) 141–148

Vapour–liquid equilibria. XII. The ternary system methanol–chloroform–acetone at 303.15 K
P. Oracz and S. Warycha (Warsaw, Poland) 149–162

Liquid–liquid equilibria for the system water + propionic acid + 1-butanol at 303.2 K. Effect of addition of sodium chloride
H.N. Sólimo, C.M. Bonatti, J.L. Zurita and M.B. Gramajo de Doz (San Miguel de Tucumán, Argentina) 163–172

Alkyl methanoates + benzene binary mixtures: New VLE measurements and DISQUAC analysis of thermodynamic properties
G. Figurski, U. Emmerling, D. Nipprasch and H.V. Kehiaian (Halle, Germany, Paris, France) 173–183

Solubility of squalane, dinonyl phthalate and glycerol in supercritical CO_2
H. Sovová, J. Jez and M. Khachaturyan (Prague, Czech Republic) 185–191

Isothermal vapor–liquid equilibria for mixtures of methyl *tert*-butyl ether, methyl acetate, and ethyl acetate
M.-J. Lee, C.-C. Hsiao and H.-m. Lin (Taipei, Taiwan) 193–207

Partitioning of some amino acids and low molecular peptides in aqueous two-phase systems of poly(ethylene glycol) and dipotassium hydrogen phosphate
C. Großmann, R. Tintinger, J. Zhu and G. Maurer (Kaiserslautern, Germany) 209–228

Solution enthalpies of NaCl and NaI in water with 1,2-ethanediol, 1,2-propanediol, 1,2-butanediol and 1,2-pentanediol at 298.15 K
S. Taniewska-Osińska and A. Pietrzak (Łódź, Poland) 229–236
Vapor–liquid equilibria in the binary systems formed by *para*-cresol and 2,4-xylenol with tetralin at 101.1 and 26.6 kPa
T.E. Vittal Prasad, S.M. Ashraf, M. Ramakrishna and D.H.L. Prasad (Hyderabad, India) 237–245
Fluid multiphase behavior in ternary mixtures of CO_2, H_2O and 1-butanol
S. Winkler and K. Stephan (Stuttgart, Germany) 247–263
Clathrate phase behavior of the phenol–methane, phenol–carbon dioxide and phenol–nitrogen systems
S.-P. Kang, J.-H. Yoon and H. Lee (Taejon, South Korea) 265–273

Transport properties
Viscosity prediction from a modified square well intermolecular potential model: polar and associating compounds
W.D. Monnery, A.K. Mehrotra and W.Y. Svrcek (Calgary, Canada) 275–287

Subject index 289–290

Author index 291

Contents of Volume 137 (1997) 293–294
